

4. Specific sign types (cont.)

4.7 Menu Boxes / Chalkboards

4.7.1 Definitions

A menu box is a weather-tight box constructed of wood with a glass or plexiglass front which is used to display menus, signs, bulletins, photographs, or other information.

A chalkboard shall be framed with wood, which may be painted an approved color or left natural. There shall be no text or logo painted incised, carved or in any other manner applied to the frame or the chalkboard.

4.7.2 Size

The menu box or chalkboard shall be no larger than five (5) square feet.

4.7.3 Construction

A menu box shall be constructed of wood, which may be painted or left natural. The front of the box shall use safety glass or plexiglass. Interior lighting should be no brighter than 450 lumens (30 watts) of incandescent light.

4.7.4 Placement

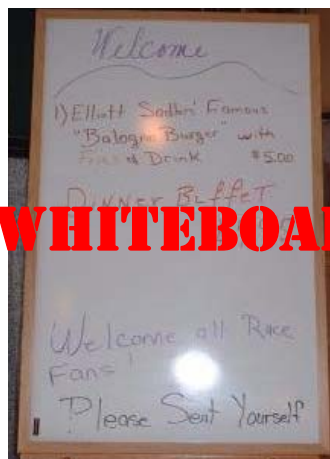

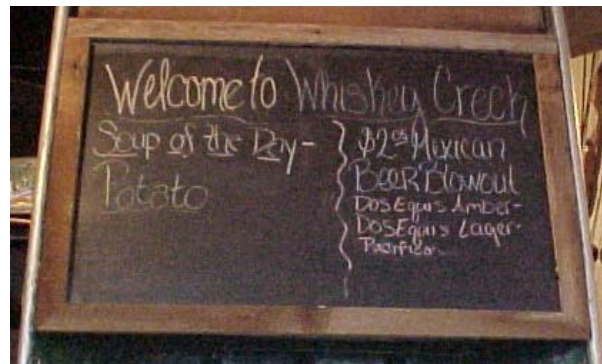

A menu box shall be placed on a structure and may not be freestanding. (See Appendix C.1)

4.7.5 Combinations

A menu box may be used in combination with one (1) of the following: awning sign, fence sign, flag sign, projecting sign, symbol sign, wall sign, or window sign. A menu box and chalkboard may be used in combination.

4.7.6 Provisions

A description of proposed illumination must be included with application.

NO WHITEBOARDS
