

4. Specific sign types (cont.)

4.13 Suspended Signs

4.13.1 Definition

A suspended sign is a sign that hangs from below a porch roof or eave and hangs in a horizontal orientation.

4.13.2 Size

A. The maximum total area of a suspended sign on a one-story building shall be no more than four (4) square feet per sign face.

B. The maximum total area of a suspended sign on a building with a street front exceeding one (1) story shall be no more than five (5) square feet per sign face.

4.13.3 Placement

A. A suspended sign must be located at or near a public entrance.

B. The lowest point of a suspended sign shall be not less than seven feet- six inches (7' - 6") above the sidewalk.

C. The highest point of a suspended sign and its supporting frame shall be no higher than the eave line of the roof.

4.13.4 Combinations

A suspended sign may be combined with a window sign or a menu box.

4.13.5 Provisions

Attachments to suspended signs are not permitted.
