2nd Floor  
Nantucket, MA 02554

Date: February 14, 2022

Subject: Baxter Road Geotubes Compliance Plan and Operation & Maintenance  
Plan (DEP File No. SE48-2824)

Dear Commissioners,

Consistent with the Town's coastal resiliency efforts, the Baxter Road Long Term Planning Study, and to demonstrate that it will be a good steward of the currently constructed project, the Town in partnership with SBPF has enclosed:

- (1) An updated Compliance Plan proposal to bring the pilot geotube project into compliance with the compensatory sand requirements of the Order of Conditions for the project.
- (2) An Operations and Maintenance Plan documenting the roles and responsibilities, procedures, and reporting practices SBPF will follow to manage and maintain the sand covered geotextile tube structure. It also includes Town roles and responsibilities to address any communication needs moving forward.

At this time, the Town of Nantucket has reviewed these documents, commented, and comments have been addressed satisfactorily.

We would like to request that the Conservation Commission join us for a workshop style meeting to discuss the Compliance and O&M Plans. The objectives of the meeting are to understand and address questions or concerns the Conservation Commission may have with the proposed plans; identify potential revisions to the plans; and gain consensus on a path forward. We have attached a draft agenda for the suggested workshop meeting.

We appreciate your time and effort in reviewing these plans and look forward to hearing from you.

Sincerely,

Town of Nantucket and Sconset Beach Preservation Fund
