IMPORTANT INFORMATION – PLEASE READ

Dear Resident,

This letter is to inform you of the Wannacomet Water Company's project to replace water mains in your area. The work will entail installing new water pipe, service lines, fire hydrants and valves. The contract was awarded to C.C. Construction Inc., and they have done multiple contracts for Wannacomet and the Town of Nantucket. The streets where the work will take place are:

Prospect Street
Milk Street from Prospect to Mt. Vernon Street
Mt. Vernon Street
Joy Street
New Mill Street
North Mill between Prospect Street and Mill Hill Park
Surfside from Sparks Avenue to Vesper Lane
Atlantic Avenue

The work is expected to begin on Monday, February 6, 2017 at the intersection of Milk Street and Mt. Vernon and then the following streets in this order; Mt. Vernon, Joy, New Mill, North Mill, Prospect, Surfside and Atlantic. This order could change depending upon weather conditions or other issues.

During Construction every attempt will be made to maintain traffic flows and water service. However, it can be expected that when working near pipes that date back to the late 1800's it will at times be necessary to turn the water off without much notice. If there is a planned water outage you will be notified directly. Wannacomet will have an on-site inspector, Lenny Avery, as well as a police traffic detail each day. The project is expected to be completed by May 15th with final paving after the settlement period to take place in October.

If you have any special circumstances or conditions that you feel we should be aware of please contact our office at 508 228-0022 or the Nantucket Police Dispatcher at 508 228-1212.

Thank you for your understanding and patience as we continue to improve the water system in your area. At the conclusion of the project available fire flow in this area will be more than doubled.

Sincerely,
Robert L. Gardner
General Manager
