

## PROJECT OVERVIEW

The Town is implementing a sewer extension project that will connect homes in five (5) areas of Nantucket to the Surfside Wastewater Treatment Facility (WWTF). The information below seeks to provide residents with answers to some basic questions (**WHO, WHAT, WHERE, WHEN & WHY**) on the project. The question of **HOW** will be addressed later in this series of informational newspaper articles.

### WHAT IS THE PROJECT?

As per Articles 18 & 19 of the April 2016 Annual Town Meeting, the Town is implementing a sewer extension project that will connect homes in five (5) needs areas of Nantucket to the Surfside WWTF.

### WHY IS THIS PROJECT NEEDED?

Several years ago, the Department of Environmental Protection required the town to evaluate wastewater management in all areas tributary to the Surfside WWTF. The resulting Comprehensive Wastewater Management Plan (CWMP) recommended extending sewers to these areas for continued environmental protection of Nantucket Harbor and other water resources in Town.

### WHERE ARE THE PROJECT AREAS?

The five (5) areas are the Nantucket Harbor Shimmo area and four (4) Plus Parcel Areas as follows: Meadow View, Green Meadows, Bayberry and Tashama/MacLean areas.

If you live in or near one of these areas and would like to know if your parcel was specifically included in the new expanded Sewer District, please visit [www.nantucket-ma.gov/NHS-Plus-Sewer](http://www.nantucket-ma.gov/NHS-Plus-Sewer) to view maps and listings.

### WHEN WILL THE PROJECT HAPPEN?

The project is currently in the final design and permitting phase with advertisement and public bidding scheduled for Spring 2017. The bid process will result in a competitive price for the construction work, which is expected to begin in mid-September 2017. Construction will pause if needed to avoid the summer 2018 season.

### WHO IS COORDINATING THE PROJECT?

Town of Nantucket — Town Administration & Sewer Dept.  
Owner's Project Manager — Hazen-Sawyer  
Design Engineer — Weston & Sampson  
Construction Contractor — TBD from competitive bid process

Approx. Length of  
Proposed Sewers -

**50,000 lf**

Approx. number of  
Properties Served -

**360**

### STREETS INCLUDED

#### NH Shimmo Area:

North Rd  
Pippens Way  
Polpis Rd  
Shawkemo Rd  
Shimmo Pond Rd  
South Valley Rd

#### Plus Parcels Area:

Bayberry Ln  
Dooley Ct  
Friendship Ln  
Green Meadows Dr  
Hussey Farm Rd  
MacLean Ln  
Marsh Hawk Ln  
Meadow View Dr  
Pinkham Cir  
Pond Rd  
Rugged Rd  
Somerset Rd  
Tashama Ln  
Ticcoma Way  
Wamasquid Pl

The Town is currently coordinating the Public Outreach program, which will consist of written information distributed via a series of news articles (similar to this) and posted on the Town's website. Another outreach component will be public meetings to discuss project overview information and smaller neighborhood or association-specific meetings to discuss project items that are more unique to the individual areas. The initial public meeting is scheduled for Tuesday, March 14th at 5PM in the CPS cafeteria. Please email any questions to [sewerproject@nantucket-ma.gov](mailto:sewerproject@nantucket-ma.gov) or call (508) 228-7200 x7800.
