TOWN OF NANTUCKET BOARD OF HEALTH TOBACCO & MARIJUANA CONTROL REGULATIONS

LOCAL REGULATION 72.00

The 1986 Surgeon General's Report on "Health Consequences of Involuntary Smoking" clearly documents that non-smokers are placed at risk for developing disease as a result of exposure to environmental tobacco smoke, or secondhand smoke. In 1993, the Environmental Protection Agency classified environmental tobacco smoke as a known carcinogen. Numerous studies have found that tobacco smoke is a major contributor to indoor air pollution, and that breathing secondhand smoke is a cause of disease, including lung cancer, in nonsmokers.

Exposure to environmental smoke presents a serious and substantial public health risk. Of particular concern is the workplace environment of nonsmokers, where they may be subjected to sustained, involuntary exposure. At special risk are children, the elderly, individuals with cardiovascular disease, and individuals with impaired respiratory function, including asthmatics and those with obstructive airway disease.
