Attention: Gregory Watson, Manager of Comprehensive Permit Programs

Subject: Submittal of Comprehensive Permit Site Approval Application  
"Sandpiper Place" Single Family Home Ownership Residential Community  
Off Old South Road, Daffodil Lane, Mayflower Circle, and Evergreen Way - Town of Nantucket

Dear Mr. Watson:

On behalf of Richmond Nantucket Single Family One LLC, our project-specific limited dividend organization and the project applicant / developer, I am pleased to submit the attached "Comprehensive Permit Site Approval Application / Homeownership" for the proposed "Sandpiper Place" Single Family Home Ownership Residential Community, to be permitted and developed in accordance with the provisions of MGL Chapter 40B.

As you know from our initial meeting with the members of your review team, the proposed project is comprised of a total of fifty (50) single family homes, to be developed on a +/- nine (9) acre site located off Old South Road, Daffodil Lane, Mayflower Circle, and Evergreen Way in the Town of Nantucket.

The proposal is a mixed-income home ownership project, whereupon twenty-five percent (25%), or thirteen (13) homes of the total fifty (50) homes in the project will be sold to buyers whose annual income qualifies within the eighty-percent (80%) of area median income (AMI) limit for Nantucket County, as established by the United States Department of Housing and Urban Development (HUD), at sales prices that will be more than sixty percent (60%) below those of the commensurate market rate homes in the project.

From a marketing standpoint, both the affordable and market rate homes will be targeted to existing, year-round residents of Nantucket, to provide a desperately needed source of new, quality single family housing to this segment of the community, as opposed to second-home or seasonal buyers. To this end, we will be seeking approval of the maximum allowable seventy percent (70%) "local selection preference" priority for current Nantucket residents and for the other categories of applicants (such as municipal employees, employees of local businesses, and households with children attending local schools) who may be eligible for this priority in the affirmative fair housing marketing plan (AFHMP) and during the "affordable" unit outreach and lottery that will be conducted to determine the initial buyers of these units, as provided for under the provisions of the "Guidelines for MGL Chapter 40B Comprehensive Permit Projects and the Subsidized Housing Inventory" (as published by the Commonwealth of Massachusetts Department of Housing and Community Development) to be reviewed and confirmed by your agency, should we be fortunate enough to obtain approval for and develop the project.

As one of the single largest landowners in the Town of Nantucket, and based on our extensive experience over the last several years in participating in collaborative master planning efforts with the Town of Nantucket Planning & Economic Development Commission, with the Town of Nantucket Planning Department, and with a number of our abutting property owners, we know first-hand the depth of the need for and the many challenges related to providing additional quality housing in this location, especially that which would be affordable to working families who live year round on the Island.

In addition to an ever-increasing acknowledgment of the critical need for such new housing by many Town officials and community leaders, as well as extensive reporting and editorial coverage of the issue by the Island's weekly flagship news publication, The Inquirer and Mirror, there is perhaps no better documentation of the critical nature and depth of this need in Nantucket than the evidence and conclusions set forth in the "Workforce Housing Needs Assessment" Report prepared by RKG Associates, Inc. (consultants) (primarily authored by Judi Barrett) on behalf of Housing Nantucket, a leading non-profit housing organization on the Island, and was published less than six months ago, in April of 2015. A copy of this report has been enclosed with this application, to supplement the documentation of market conditions and demand, as required in Section 5.2 of the application.

The report was based on extensive research and dozens of interviews and meetings with Town officials, community leaders, and other key local stakeholders who are directly involved in and impacted by the housing shortage issue, and also includes a substantial amount of empirical and statistical evidence of the extent of the crisis and the dire need for significant additional housing, particularly year round housing, both for sale and rental, that is within reach of the middle class and mixed-income segments of the community.

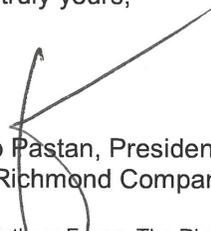

In terms of our ability to successfully implement the proposed project, as you know, in addition to our extensive experience in developing both single family and multi-family market rate residential projects over the last +/- twenty years in Eastern Massachusetts, The Richmond Company, Inc. is specifically well versed in the permitting, approval and development requirements relevant to projects undertaken under MGL Chapter 40B. This experience was most recently evidenced by the completion of our fourteen (14) unit "Richmond Vista at Wakefield" townhouse (home ownership) project and the abutting one hundred and fourteen (114) unit "Richmond Vista at Wakefield" apartments (rental) project, both of which were located in the Town of Wakefield, which were permitted, constructed and occupied over the past several years.

To supplement our own experience and to maximize the prospects for a successful project, we have assembled a highly capable project team that has decades of experience in permitting and developing mixed-income residential projects in Massachusetts, including, but not limited to SEB LLC, one of the pre-eminent 40B consulting firms in the Commonwealth (led by Robert Engler, Geoff Engler, and Brian Engler).

We are excited about the prospect of developing this project and the opportunity to do our part to help address the current, undeniable housing shortage in Nantucket, by providing a meaningful source of new, high quality single-family housing, particularly including the affordable units, in the community, and we look forward to working with you and the other members of your team at the Agency as the review of our project progresses.

Please feel free to contact me should you have any immediate questions with respect to our application, or any aspects of the proposed project.

Very truly yours,

  
Philip Pastan, President
